TO WHOM IT MAY CONCERN

I am pleased to write regarding **Mr. KRISHNA KUMAR SAH**, passport no.09684868, DOB: DEC 30th 1990, application for a position in the master's program at your institute.

I came to know **Mr. KRISHNA KUMAR SAH** during his time at Dali University affiliated hospital where he did his internship. As the tutor of surgery Department I was able to keenly observe him during his rotation at surgery Department which help me form an opinion about him and have come to regard his personal and professional qualities highly suitable for a career in general surgery. He is disciplined and punctual at work, kind and compassionate towards patients and respectful and co-operative towards teachers, seniors and colleagues. He had a good grasp of the subject with a keen interest to learn and further knowledge and skills. He had a very good working relationship with the hospital staffs.

He has been in regular correspondence with me and thus having known and guided him during these early days of his career, and on witnessing his improvement. I believe that a successful career lies ahead for him if he continues to progress at this rate. As such I am pleased to recommend him for a post graduate program in general surgery as he seeks to further his knowledge and skills.

If you have any further query regarding this recommendation please do not hesitate to contact me, as I would be glad to provide any additional information which would further strength his application to join your program.

.....
Prof. Dr. Wu Xue dong (MS)

Head of Cardiothoracic surgery

Dali University affiliated hospital

Dali Yunnan, China
