Letter of Recommendation

It is a great pleasure to recommend Mr. [redacted] Khan for admission to your master's program. I found him hard working and honest to his studies. I taught him Oil-Gas field development engineering and this gave me the chance to gain insight into his abilities and personality. From the beginning Mr. [redacted] Khan had showed himself as an intelligent and hardworking student. In class he was always attentive and concentrated. He has done very well and obtained A grade in my subject you can see his Detail marks sheet. His Chinese speaking level is also good. He consistently took an active part in class discussion and seminars, bringing in a lot of thoughtful comments and interesting presentations.

He always shown difference and behaved decently with his teachers. The important thing about his personality and flexibility and adaptability he keeps evolving, learning, adapting and taking good things in. His personality changes according to his surrounding people and environment. Whatever he makes mistakes unintentionally, he redresses them without delay.

Mr. [redacted] Khan is determined to face higher challenges and strong competition. He is interested in strengthening his academic proficiency by pursuing his higher studies. He insists on self-learning through extensive reading and attending some professional exhibitions. I believe that studying at your university will provide him with valuable experience and deep understanding of the subject he is sincerely interested in. I do not feel any hesitation in stating that he can perform well in research field if he gets a proper platform. That is why I recommend him graduate program.

Sincerely,

Liu xiong
